

FOR A BETTER WORLD OF ENERGY  
**NORTHERN IRELAND  
COMMUNITY FUND**

**ANNUAL REVIEW 2019/20**

Introduction to the SSE Airtricity Northern Ireland Community Fund

SSE Airtricity and SSE Renewables are part of the SSE Group. SSE Renewables is Northern Ireland’s largest generator of wind power and provides voluntary community funding in support of energy efficiency, safety and sustainability projects. This funding is awarded to community groups near SSE Renewables’ three wind farms in Northern Ireland: Bessy Bell, Tievenameenta, and Slieve Kirk Wind Park. The Community Fund for each is operated by sister company SSE Airtricity.

FOREWORD

2019/20 has been a busy year for the SSE Airtricity Community Fund, which distributes funding from SSE Renewables’ wind farms in Northern Ireland to community groups and projects. The fund has now been in operation for 11 years and has awarded £2.98 million to support communities in Northern Ireland. During this time the focus has been on supporting local regeneration through community-led economic, social and environmental development.

This year we launched our newest fund - the Learning for Life fund. This innovative fund sees us partnering with The Workspace Group NI. We have funded Workspace to support the ongoing provision of learning, training, education and employment initiatives which help build capacity, tackle rural isolation, and increase employment opportunities.

In February 2020, SSE Renewables sold Slieve Divena II wind farm near Ballygawley, Co. Tyrone to Greencoat UK Wind. Although the wind farm has been sold, SSE Airtricity will continue to operate the annual community fund for Slieve Divena II on behalf of the new owners, ensuring that communities continue to benefit.

In March 2020, the coronavirus pandemic dominated everything. It really is remarkable how quickly communities reacted and mobilised themselves and I hope that by making our funds available to help with the emergency response, it has helped to make things that little bit easier. As we are emerging from lockdown it is clear there are many challenges ahead, but having seen the positive effects that our funding has had with helping towards the coronavirus response so far, our objective is that the funds continue to play a part in helping communities in the recovery phase.

However, this report is focused on the 2019/20 year as a whole. It is a summary of every grant awarded to every community group we work with. Over the year we have awarded £670,000 to community groups, charities and grassroots organisations. This report highlights how every penny has been allocated and showcases only a small number of the projects and people that have received support from wind farms owned and operated by SSE Renewables by the SSE Airtricity Community Fund.

I hope you enjoy reading this report, and that like us you are inspired by the amazing work taking place in communities across Northern Ireland. I would like to thank everyone involved for their hard work and good judgement, particularly the countless volunteers who play a huge part in every community.

Handwritten signature of Mark Ennis.

Mark Ennis  
SSE Ireland Chairman

## SUPPORTING LOCAL COMMUNITIES DURING THE CORONAVIRUS CRISIS

SSE Renewables' experience of working with communities has shown that each community is unique and that communities themselves are best placed to respond to their own needs. When the country went into lockdown in March 2020 due to the coronavirus pandemic it was clear that communities would play a key role in ensuring the most vulnerable residents were protected and supported.

The ability of local communities to establish projects and respond so quickly to this unprecedented public health emergency has been particularly impressive. Our response was to make sure that funding was brought forward and made available to help groups.

Making funds available immediately meant changing the way in which the SSE Airtricity Fund usually operates and so a new process was developed and trialled with the communities around the Slieve Kirk Wind Farm. An initial £50,000 was made available for the emergency response and community groups very quickly responded and applied for the funding for a range of innovative projects. As well as helping to fund personal protective equipment and training for volunteers the funding has also supported projects to deliver food packages, meals and medical supplies for the vulnerable and shielding and support for school children with their learning. With the initial funding being in demand and oversubscribed, the decision was taken to make the full 2020/2021 annual funding available.

St Matthews GAA club Dumsurn organised a community rapid response utilising the club hall as a base. Through funding provided from SSE Airtricity they were able to provide a meals-on-wheels service and food hamper donations to approximately 100 people in the local area.

Eunan Rafferty St Matthews GAA club chairman said: "Through funding from SSE Airtricity we were able to support the most vulnerable in our community and those affected most severely through Covid-19. Those who received the food deliveries have asked me to express their thanks to SSE Airtricity for enabling us to provide such a service in these unsettling times. Over the years we are lucky enough to have received funding for projects for our GAA club however, the funding received this year was the most critical and I know our whole community is beyond grateful for this support".

### THE ROAD TO RECOVERY

The initial and immediate response to this unprecedented emergency is one thing, but it is clear that the road to recovery is going to be a long one. SSE Renewables' model for sharing the economic value of its investments with the communities around its wind farms will continue and the funds will be even more critical to helping communities and their economies bounce back over the medium term.

Conor Rafferty, senior footballer St Matthews GAC on behalf of Club sponsor SSE Airtricity presents Club Chairman Shane McGonigle with one of the many food hampers which are to be distributed in the local community during the Covid-19 pandemic.

# BUILDING SUSTAINABLE PARTNERSHIPS

At SSE Airtricity we are committed to supporting the communities in which we live and work. Since the establishment of the first community fund in 2008 we have seen the impact that actively contributing to the communities can have. Relationships have been formed and friendships created over the years and SSE Airtricity is proud to be part of the local communities around our SSE Renewables wind wind farms.

SSE Airtricity works closely with community groups to support the delivery of projects. Anne Reynolds works as SSE's Community Development Officer and has the important role of supporting groups which are applying to the fund. Anne provides practical advice and assistance throughout the application process.

'I absolutely love my job. To be welcomed so warmly by the communities in which our wind farms are located and to able to help support projects which these community groups hold so dear to their hearts is an honour. I look forward to meeting all the groups each year as they have now become friends and to see projects we support come to fruition is the best part of my job.'

Anne Reynolds, SSE Airtricity Community Development Officer

Unusually for a developer, we manage and administer our own funds. This helps us build a closer relationship with each community, resulting in a greater level of trust. It also helps to create an environment where we can have open and direct communication with communities to improve our processes and help them to harness the potential of their funds.

# SUSTAINABLE SURROUNDINGS

Protecting the natural environment and taking measures to reduce energy consumption within communities are important initiatives which we strongly encourage.

## PROVIDING OPPORTUNITIES TO GROW

St Oliver Plunkett Primary School, Beragh is an education provider for children aged 3-11 and allow their premises to be used by local community groups for meetings, training sessions and class practice. In 2019 St Oliver Plunkett Primary School applied for funding from the Slieve Divena II community fund to upgrade the existing lighting in the school with more efficient LED lighting. The School are currently part of the Eco Schools and are committed to helping the environment and this funding will help that goal. Barry Conroy, Teacher at St Oliver Plunkett said

'St Oliver Plunkett Primary School Beragh were delighted to be successful in the Slieve Divena II Community fund. This funding has allowed us to upgrade the existing lighting in the school with energy efficient LED lighting. By replacing the lighting our school is able to make our energy use more sustainable, reduce our carbon footprint and provide educational benefits to the children with being in a brighter learning environment. Our school is involved in the Eco-Schools programme and this grant helps establish environmental habits into the pupils at a young age and instil the need to carry sustainable behaviours through to homes'

Barry Conroy, Teacher St Oliver Plunkett PS Beragh

## MAKING A SUSTAINABLE DIFFERENCE

As Part of the 2019 Slieve Kirk Wind Park Community Fund Limavady Cricket and Rugby Club were awarded funding towards their energy efficient heating system upgrade. Limavady Cricket Club are a cross community based organisation whose clubhouse is extensively used for community based activities such as youth club, training courses and private events. Provision of this energy efficient heating system will result in lower annual energy bills and provide a more sustainable heating source therefore reducing the clubs carbon footprint. Harry Faulkner, Treasurer of Limavady Cricket and Rugby Club said

'Funding received from the SSE Airtricity Community Fund in 2019 enabled Limavady Cricket & Rugby Club to replace the existing oil boiler for a new gas cascade boiler which has provided for an annual saving of approx. £2300. This boiler is 98% efficient and provides a sustainable heating option for the club which will provide savings for years to come. We are so grateful to SSE Airtricity for their support to the club through this grant.'

Harold Faulkner, Limavady Cricket & Rugby Club

# BRIGHT SPARKS

## THE SSE AIRTRICITY SCHOLARSHIP SUPPORTS OVER 200 STUDENTS

The SSE Airtricity Scholarship was first established in 2014, and to date has provided funding to over 200 students with a total of £670,000 awarded to date.

The scholarship was established to promote learning and skills development in the local community around Slieve Kirk Wind Park, Slieve Divena II and Tievenameenta wind farms. It is targeted at full and part-time students from the counties of Derry-Londonderry and Tyrone attending either the University of Ulster, South West College or North West Regional College and offers a wide range of eligible Foundation, Bachelor and Master's level courses, such as focusing on science, technology, engineering and mathematics (STEM) subjects in a bid to help fulfil employment demands in these fields in Northern Ireland.

The SSE Airtricity Scholarship programme was created to help local students with their student fees and living expenses whilst forming a pool of well-trained and experienced development professionals, transforming Northern Ireland and positively impacting future generations.

Photo: SSE Airtricity Scholarship Awards 2019, University of Ulster

Photo: SSE Airtricity Scholarship Awards 2019, North West Regional College

"I was very fortunate to receive an SSE Airtricity Scholarship, which contributed 50% towards my university fees. It gave me a huge amount of confidence allowing me to thrive within my degree and focus solely on my studies without additional financial worries. Coming from a small rural community opportunities to achieve such funding is slight and I can honestly say this funding is the sole reason why I was able to pass and achieve my foundation degree in Early Childhood Studies. I will be taking up a place in Liverpool Hope in Sept 2020 to hopefully receive a Bachelors which will allow me to fulfil my dream of working with children."

**Michele McCann,**  
*Foundation Degree in Early Childhood Studies, South West College*

"We are delighted that 19 of our students have each been presented with a prestigious SSE Airtricity Scholarship, which helps to finance Higher Education study for local students. This year we have recipients from Art & Design, Built Environment, Computing, Mechanical Engineering, Electrical Engineering, Science and Media Multimedia. The scholarships will be used in a variety of ways to support the students on their journey to gain qualifications in priority skill areas enabling their careers in key disciplines that are critical for our regional and national economy.

As a STEM assured college NWRC is very proud of the quality of the STEM courses offered at our five campuses across the North West, which are an attractive proposition for local school leavers. We believe passionately that as many students as possible should have access to third level education, and the funding support made available to our students from SSE Airtricity through its Scholarship programme will have a hugely positive impact on the lives of young people and our community in the North West."

**Danny Lavery,**  
*Head of Science, Technology and Creative Industries at North West Regional College*

"This scholarship has benefitted me in very practical ways. I have purchased a new computer and printer, which allow me to study more effectively at home. Travelling to and from college and placement had been a significant financial burden, which has now been lifted due to the support from SSE Airtricity."

**Niall McCaughey,**  
*Construction Engineering with Surveying South West College*

"I would like to thank SSE Airtricity for awarding me this scholarship of £2,500. It has greatly helped me to focus on my studies, by making me being less reliant on my part-time job to fund my day to day expenses. It has also helped contribute towards my tuition fees at college."

**Coblait McKenna,**  
*Civil & Environmental Engineering with Surveying South West College*

# LEARNING FOR LIFE

In 2019 SSE Renewables launched an innovative “Learning for Life” skills fund which aims to help support individuals through the provision of learning, training, education and employment initiatives that help build capacity, tackle rural isolation, and increase employment opportunities in areas surrounding our wind farms.

The SSE Renewables ‘Learning for Life’ Skills Fund is funded from local wind energy across Tyrone, Fermanagh and Derry-Londonderry through the SSE Renewables Regional Fund. The Regional Fund, which receives financial contributions from SSE Renewables-operated wind farms in the region, already supports the SSE Airtricity Scholarship.

In November 2019, SSE Renewables were delighted to partner with The Workspace Group NI through the provision of £75,000 awarded to The Workspace Group NI towards an employability, mentoring and training programme over a 5-year period.

The Workspace Group NI delivers programmes and services aimed at boosting local regeneration, community cohesion and grassroots development in and around Mid Tyrone. A donation of £75,000 to Workspace will facilitate their work in engaging people to improve their quality of life by investing in people and places and by supporting community-led regeneration plans and sustainability initiatives.

With The recent Coronavirus Pandemic it is hoped that this funding can help provide practical solutions to major challenges by working in partnership with local communities, key funding bodies, statutory authorities and other agencies.

# WORKING WITH WORKSPACE

As a result of SSE Renewables’ Learning for Life funding The Workspace Group, Draperstown has been able to enhance both the quality and quantity of their employability mentoring and training provision.

In response to the demands of local young people who expressed a desire for greater training opportunities in digital media and creative industries, the funding has allowed for the purchase professional standard digital cameras and equipment. The Workspace group now delivers hands-on learning and an accredited qualification (Creative Arts and Digital Media) for those who wish to pursue a career in this field. This has also proven to be a great pathway to further training.

SSE Renewables’ ‘Learning for Life’ funding has also meant that many more people from the Mid Ulster area have been able to benefit from the Workspace Group’s social inclusion provision, taking part in workshops to promote social interaction, positive mental health and enhanced ‘soft skills’ in preparation for employment and/or training.

Alex McKee, Operation’s manager states “SSE Renewables’ generous funding commitment has seen a huge impact on the scope of what we can offer. The purchase of new equipment has allowed us to ‘move with the times’ and expand our offerings to meet the high expectations of tech-savvy young people who wish to seek employment in digital industries. In addition, the funding has allowed us to further develop our commitment to holistic employability support, providing more workshops that go above and beyond CV-building and interview skills”

# HOW TO APPLY

## The SSE Airtricity Community Fund

The application process for the SSE Airtricity Community Fund is simple. Firstly find out which wind farm is in your vicinity and make sure you meet the criteria listed below:

- Your group is a not-for-profit organisation
- You are requesting funding to benefit a community initiative, not an individual (although individuals may apply on behalf of a community project)
- Your community is situated within a 12-mile radius of the related wind farm. Priority is given to projects within a 3-mile radius

Next check the opening and closing dates for each of SSE Airtricity Community Funds on the SSE Renewables website, [www.sserenewables.com/communities/community-fund-locations/northern-ireland](http://www.sserenewables.com/communities/community-fund-locations/northern-ireland) and make sure your project fits in one of the following categories:

- Energy Efficiency: Delivers reduced energy consumption
- Sustainability: Drives community-centred environmental and/or social sustainability interest
- Safety: Improves safety for the community

Completed application forms should be submitted via email to [communityfundireland@sse.com](mailto:communityfundireland@sse.com) or send to SSE's Community Development Officer, Anne Reynolds, at SSE Airtricity, Millennium House, Belfast, BT2 7AQ.

All Community Fund applications are evaluated on a competitive basis by a scoring panel. Proximity to the wind farm and the number of beneficiaries will be a key consideration. All applicants will be informed whether they are successful or unsuccessful. If successful, the team will let you know how much your project will be awarded and will organise a visit to your community to present successful groups with their funding.

If you have any queries with regards to these forms or the community fund please contact the team by emailing [communityfundireland@sse.com](mailto:communityfundireland@sse.com) or call Anne Reynolds on 028 903 39 186.
