- Indicative Viewsheds \*\***
  - VP5A - Primary
  - VP5B - Secondary
  - VP6A - Primary
  - VP6B - Secondary
  - Waterbody (incl. ID)

**Note**  
 \* The 500m turbine buffer is also referred to as the 'flight risk area' (FRA), as used within the collision risk modelling (CRM).  
 \*\* The viewsheds have been generated using 50m resolution digital terrain model data (OS Terrain 50) and have a 10m a.g.l. offset. Viewsheds have been clipped at 2km radii from the VP, and limited to a 180 degree arc of view.
