1. This is not a construction drawing and is intended for illustrative purposes only.
2. WYG accepts no responsibility for errors in OS Data Survey Mapping.
3. The OS Data Mapping carriageway was found to differ from that observed on site visit at this location. The road was also observed to be sub-standard in width for the proposed loads and requires widening. As such an indicative 4.5m carriageway has been included for illustrative purposes only. Existing carriageway alignment and associated widening works should be confirmed and approved by both client and haulier before deliveries begin.
4. Third party land will be required to provide the proposed 4.5m widening.

2. WYG accepts no responsibility for errors in OS Data Survey Mapping.  
3. The OS Data Mapping carriageway was found to differ from that observed on site visit at this location. The road was also observed to be sub-standard in width for the proposed loads and requires widening. As such an indicative 4.5m carriageway has been included for illustrative purposes only. Existing carriageway alignment and associated widening works should be confirmed and approved by both client and haulier before deliveries begin.  
4. Third party land will be required to provide the proposed 4.5m widening.

1. This is not a construction drawing and is intended for illustrative purposes only.  
2. WYG accepts no responsibility for errors in OS Data Survey Mapping.  
3. The OS Data Mapping carriageway was found to differ from that observed on site visit at this location. The road was also observed to be sub-standard in width for the proposed loads and requires widening. As such an indicative 4.5m carriageway has been included for illustrative purposes only. Existing carriageway alignment and associated widening works should be confirmed and approved by both client and haulier before deliveries begin.  
4. Third party land will be required to provide the proposed 4.5m widening.
