

# **Ireland Community Investment Review**

2022/23

# **Foreword**

With the climate emergency and energy security at the top of the international agenda, SSE Renewables is proud of the part we're playing in Ireland's transition to renewable power. In the last year we've continued to produce huge amounts from our onshore wind farms across Ireland, while progressing the next wave of industry leading projects, both onshore and offshore.

We recognise that the transition is not just about our assets but also about the communities in which we operate. We remain committed to investing to ensure that Irish communities have what they need now and for the future. In 2022/23 SSE Renewables has donated over €1 million to local projects to invest in issues as diverse as inclusive sport to biodiversity centres.

SSE Renewables is committed to implementing industry best practice for our community funds. Our new Lenalea Community Fund is our first Irish fund to be developed based on the finding of community consultation with funding decisions being made by a panel of local people who will ensure the fund creates a lasting impact for communities.

As we build more renewable assets across Ireland, including Yellow River Wind Farm, we are ensuring that the country benefits from local, clean, resilient energy with a commitment to local supply chains to boost our economy. As part of this commitment, we will collaborate with communities to help them achieve their ambitions and support thriving, robust and prosperous communities across Ireland.

Our community commitments are at the centre of our vision and mission. We commit to collaborating with communities over the lifetime of our assets and we know it is crucial we build strong relationships with local communities.

Over the past year the ambition of communities has continued to grow. The number of local groups applying for projects linked to the net zero transition is inspiring. We know that to achieve our net zero ambition we need the support of communities. Every insulation project and every electric vehicle charging point installed is helping Ireland to lead the way on achieving a clean, green future.

# **Achieving** our priorities

2022/23 has been a year of growth and development for SSE Renewables Community Funds. We have accelerated our delivery across all our provision including:

Lenalea Wind Farm – in line with industry best practice, we conducted a robust community consultation with local communities in 2022. The exercise enabled the local communities to inform the key priorities for the community benefit fund (see page 6).

Supporting a green future – an increase in applications from communities across Ireland looking to support the climate emergency from retrofit training (see page 10), solar panel installation to electric car infrastructure (see page 7).

Enhanced capability – we have enhanced our Irish community investment team to ensure we have the skills and experience to manage the growing ambition of our existing funds. The team now has considerable experience in community development, social impact and community consultation.

2023/24

### **Priorities**

Lenalea – we will launch the Lenalea Community Benefit Fund in June 2024. To support the introduction of the fund we will be delivering specialist induction training for the local panel and will hold information and capacity building sessions for the local community.

Yellow River – we will begin the community consultation for the delivery of the Yellow River Community Benefit Fund in 2023. This will enable the local residents to undertake a community needs assessment to identify the strengths and opportunities in the local area. We will also begin to take notes of interest to join the local panel.

New funding strategy – following feedback from applicants, we will be amending our funding strategy to focus on social impact projects. We will issue new guidance for applicants and implement a new scoring matrix focused on local priority criteria. The changes will enable the allocation of larger grants for social impact projects and the potential for multi-year

Data Management - to enable the new team to deliver to their full capability we have procured a new data management system which will be implemented across our funds in 2024.

# Consulting with local communities

### **Lenalea Community Fund**

Lenalea Wind Farm is in the final stages of construction in central Donegal and will provide enough power for 20,000 homes. To prepare for the introduction of the Lenalea Community Fund we hosted two community consultation events in October 2022. The events were attended by over 50 people in Ballybofey and Letterkenny, the closest towns to Lenalea. They presented an opportunity for us to update local residents on the community commitments and discuss the mechanisms in place for the new fund. A detailed community needs assessment was completed to enable residents to express what they felt the strengths, weaknesses and opportunities in the local area are. This exercise identified a potential socio-economic opportunity from growing tourism activity in the region and identified a gap in provision for young people.

Based on the findings of the community needs assessment, two youth forums were hosted in Raphoe and Stranorlar to understand the ambition of young people in the area. Over sixty young people attended the forums and identified their key priorities for a wider range of sports and leisure activities. The young people also highlighted they often leave the area for work and further education and want more opportunities to remain within the local community.

Community consultation events and youth forums will continue across 2023 to help increase the awareness of the new fund in the local area and seek further opinions on local priorities.

### **Bunnoe Community Enterprise Centre**

Ireland has a target to have 945,000 electric vehicles on its roads by 2030. Achieving this target requires the infrastructure to support drivers, especially in rural areas. The community of Bunnoe is currently ten miles from any publicly available electric chargers. To help locals and visitors, the Bunnoe Community Enterprise Centre has installed a charger. Based beside the community centre, GAA club and football club the charger will enable people to charge while visiting the local amenities.

"In a rural area like Bunnoe, people have to travel at least 10km to access an EV charging point. The provision of this charger has improved efficiency and reduced cost for our locals, it has attracted people to the area to avail of the charger and use other resources whilst waiting and most importantly it demonstrates our commitment and support towards achieving net zero." Patsy Fitzpatrick, Volunteer, Bunnoe Community Enterprise Centre.

# Supporting the most vulnerable

# **Knockanure Community Development Association**

Many communtiles have been impacted by the cost of living in the last year and the community funds have been available to ensure that key community services can continue to reach the most vulnerable. The meals on wheels service in Listowel supports over 130 residents each week. With the kitchen equipment reaching the end of its life, the community association faced increased costs to replace their steam oven. The donation from SSE Renewables helped to offset the increased cost and ensure the service continued to meet their health and safety requirements. The service is a vital element of support for isolated residents in rural areas

**€2,000**donated from Dromada and Leanamore Wind Farms

"Our service provides consistency, reassurance and a social outlet for many of our isolated residents. Unfortunately for many this is the only social contact they have in the day so our team make the effort to have a chat whilst delivering the meals and ensuring the resident is fit and well. The additional equipment provided by SSE Renewables has ensured the quality of service is maintained which is something we pride ourselves on."

Nora Winter, Manager, Knockanure Community Development Association

# **Supporting cultural tourism**

#### An Súgán Museum Trust

Supporting the culture and heritage of local communities is a key priority for the community funds in Ireland. The support for An Súgán Museum will help create the country's first national museum dedicated to the Irish language and the Gaelic revival. The museum project is designed to develop the remote Gaeltacht economy through cultural tourism as well as to support the preservation of heritage and the Irish Language in the Gaeltacht. The museum will support the Coláiste na Mumhan Irish College summer schools with relevant content. The donation from the community fund will help to enhance the visitor experience development and determine the content for the museum.

"Tá An Súgán buíoch as an dtacaíocht airgidis a fuarthas ó SSE Renewables le haghaidh an eispéireas cuartaíochta agus na háiseanna a fheabhsú don Iarsmalann Athbheochan agus Teanga na Gaeilge." Tim Twomey, Team Leader, An Súgán .

# Enhancing inclusive communities

# Bailieborough Swimming & Leisure Centre CLG

As communities re-opened after the pandemic, it made many community organisations consider how they enhance provision to be as inclusive and accessible as possible. Over 1,000 people use the not-for-profit leisure centre in Bailieborough, and the volunteers wanted to ensure people of all physical abilities could safely access the sport and leisure facilities. The funding enabled the committee to develop a wheelchair accessible changing facility, specifically designed to ensure that people can benefit from dignified and safe facilities within the centre. The facilities have been especially beneficial to the silver fins swim classes which instruct children with reduced mobility.

"This funding has allowed us to provide facilities to support our less abled members and provides for them an opportunity to use the leisure centre in comfort through the space and privacy provided from the new wet room. Since installation we have already seen an increase in disabled users partaking in activities and hope this encourages more people to avail of our services" Mairead Galligan, Chairperson, Bailieborough Swimming & Leisure Centre

### Comhairle Ceantar na nOileán Galway Major Project Fund

To achieve meaningful and lasting climate action in Ireland we need to ensure households across the country achieve home energy upgrades. The requirement for home retrofits is at the centre of the country's climate priorities, including new national retrofit targets. To respond to this national requirement, there is a need for a significant upskilling of installers to meet the increasing demand for the improvements.

Comhairle Ceantar na nOileán received €110,000 to establish the Low Carbon and Sustainability Centre of Excellence in Casla. The centre will create new sustainable economic opportunities that will contribute to the economic, social, and environmental sustainability of the region by supporting the re-skilling of workers and supporting homeowners to complete improvements. They will provide skills in emerging retrofit technologies including solar PV, external wall insulation and ventilation. The project will train 280 professionals per annum and support the energy improvement of up to 10,000 local homes.

"In Galway, the waiting list for energy efficient home upgrades is nearly 2 years. Through the development of this training centre in Galway, timeframes for upgrades will be reduced with the project having the potential to impact over 30,000 individuals and in excess of 10,000 homes and contribute towards Ireland's net zero goal"

### Killannin GAA for All Galway Local Fund

It is important that all children can benefit from and enjoy sports activities. Killannin GAA for All supports children who have additional needs and enables them to participate in club activities in a safe, fun non-competitive environment. They help the young players to develop their physical, language, emotional and social skills. The sessions are facilitated by volunteers who have trained as special needs assistants and teachers, and they develop fun activities to provide the best experience at every session. The €2,500 donation has enabled the club to purchase new kits for the children and to grow their equipment range to support more age groups and abilities.

"Our club came about to address a necessity to include children who have additional needs within our community and allow them to participate in club activities in a safe, fun non-competitive environment. Our aim is to help our players develop their physical, intellectual, language, emotional and social skills. The funding towards additional equipment allows a variety of games and enables us to give them the best experience at every session."

Cola Murphy, Killannin GAA for All committee member

# Galway Scholarship Fund

Since 2018 we have partnered with University of Galway to offer scholarships to their students. John Hannon, Director of Student Services outlines why scholarships are an important part of the universities support offering.

#### How do scholarships help the university achieve your aims?

The University of Galway run a variety of scholarship programmes to help make third level education easier to access. The main reason we run scholarship programmes is to offer deserving students the opportunity to pursue their educational goals and dreams. The provision of scholarships encourages diversity and inclusion and helps develop a talent pipeline in a variety of disciplines which closely aligns with our values and aims. Our vision at University of Galway is to be a driver of transformational change for our people, our region, and our world. Through the provision of financial support, we are enabling and empowering students to advance the critical roles required to deliver sustainable development.

#### Why are scholarships important for your students?

Scholarships provide financial support for students to help pay for their university degree. These funds enable students to obtain a third level education they may not have access to otherwise. At the University of Galway, feedback from recipients is that the funding allows them to prioritise their studies over part-time work and relieves financial pressure for parents and carers. Being awarded such a prestigious scholarship instils a sense of pride in the recipients and they are encouraged to pass all exams to maintain the scholarship support.

#### How do you determine who gets a scholarship?

With the Galway Wind Park scholarship distance from the windfarm is the key criteria to ensure those nearest the site are recognised. The weighted criteria are distance, STEM and then we look at the application and if they have any outstanding academic or personal achievements.
