

## APPENDIX 8.8: CUMULATIVE VISUAL RECEPTOR ASSESSMENT TABLES

### 1.1 Receptors at Viewpoints

Name/ Location/ Type/Context	Description of Baseline Cumulative View	Sensitivity to Additional Change	Existing and Proposed Wind developments theoretically Visible (P=Peripheral)		Nature of Change	Cumulative Magnitude of Change	Cumulative Visual Effect
			In Combination <sup>1</sup>	In Succession <sup>2</sup>			
<b>VP2: Glenbarr War Memorial</b> (Refer to Figures 8.9.2.1-5) <i>This VP represents views from northern Glenbarr settlement and illustrates views from receptors visiting this memorial or travelling along the A83, to the north of the proposed development.</i>	Main views are north or south along the road with side views west out to sea and east towards the Glenbarr War Memorial. In views south, Tangy I and II tips are visible on the skyline above the coniferous forest plantation.  Side views up Glen Barr to the east also include turbines of Blary Hill, Auchadaduie and Beinn an Tuirc (Phase 1).  Side views east over the sea also include Gigha and Gigha Extension.	Medium	<i>Operational</i>		In main views to the south, turbines at the proposed development would be seen above the forest in place of existing Tangy I and II but would be larger. When seen in combination with the cluster of wind developments at BaT (Phase 1), Blary Hill and Auchadaduie, the proposed development would result in a noticeable increase in wind turbines in southerly views whereby they would become prominent but would not dominate or obstruct the view.	Medium	<b>Moderate</b>
			BaT <sup>3</sup> (Phase 1) Tangy I and II (to be removed)	Alt Dearg Gigha Gigha Ext.			
			<i>Consented/Under Construction</i>				
			<i>Application/Appeal</i>				
			Auchadaduie Blary Hill	Airigh Clachaig Glen Killean Estate			
<b>VP3: Barr Glen</b>	Main views are channelled along the	Low	<i>Operational</i>		In southerly views, the turbines	Low-	<b>Minor</b>

<sup>1</sup> Sites visible **in combination** with the proposed development refer to those that are visible within the observer's arc of vision with the proposed development. That is, within a 90° field of view of the proposed development, where the proposed development may be on the edge of the 90° field of view. Sites within 60-90° would be within the observer's peripheral field of view and are marked accordingly.

<sup>2</sup> Site visible **in succession** with the proposed development refer to those that are visible when the observer turns their head away from the proposed development.

<sup>3</sup> Beinn an Tuirc

Name/ Location/ Type/Context	Description of Baseline Cumulative View	Sensitivity to Additional Change	Existing and Proposed Wind developments theoretically Visible (P=Peripheral)		Nature of Change	Cumulative Magnitude of Change	Cumulative Visual Effect
			In Combination <sup>1</sup>	In Succession <sup>2</sup>			
<p>(Refer to Figures 8.9.3.1-5)</p> <p><i>This VP represents views from the public road and scattered properties in the western part of Glen Barr (but is not representative of views from Glenbarr settlement), to the north of the site.</i></p>	<p>valley: east along the valley and west along the valley towards the sea.</p> <p>In views to the south, some blade tips of Tangy I and II turbines are visible on the skyline, but largely screened by coniferous forest plantation.</p> <p>In views to the east, turbines at Auchadaduie and Blary Hill would be prominent on the southern valley slope in close proximity, while Beinn an Tuirc (Phase 1) turbines are visible seen through/to the rear of Blary Hill.</p>		BaT (Phase 1) (P) Tangy I and II (to be removed)		<p>at the proposed development would replace tips of Tangy I and II, seen above the southern valley slope as blades and some hubs above coniferous forest plantation. These turbines would appear to be a similar scale to Beinn an Tuirc (Phase 1) (turbines, but smaller and more distant than Auchadaduie and Blary Hill turbines which would be more prominent in the overall view but would result in turbines being more perceptible within the southerly view.</p>	Medium	
			<i>Consented/Under Construction</i>				
			Auchadaduie Blary Hill (P)				
			<i>Application/Appeal</i>				
<p><b>VP5: Gigha (South Pier)</b></p> <p>(Refer to Figures 8.9.5.1-5)</p> <p><i>This VP illustrates open views from the coast of southern Gigha, on the South Pier, to the north of the proposed development (but is</i></p>	<p>The main view is panoramic to the south and east, towards the islands of Gigha and Cara in the midground and the Kintyre coast and uplands in the distance. The turbines of Tangy I and II, Beinn an Tuirc (Phases 1, 2 and 3), Blary Hill and Auchadaduie would all be visible along the skyline, running along the interior upland 'spine' of Kintyre. In closer proximity, turbines of Clachaig Glen and Killean Estate would also be</p>	Medium	<i>Operational</i>		<p>There are distinct clusters of wind farms and turbines visible on the Kintyre skyline, resulting in a pattern and rhythm of wind development along the 'spine' of Kintyre. The proposed development would replace the existing Tangy I and II and generally fits with this pattern and would be visible above the 'spine' set back from coastal slopes.</p>	Low	Minor
			BaT (Phase 1) BaT (Phase 2) Tangy I and II (to be removed)	Gigha Gigha Ext.			
			<i>Consented/Under Construction</i>				
			Achadaduie BaT (Phase 3) Blary Hill				
			<i>Application/Appeal</i>

			In Combination <sup>1</sup>	In Succession <sup>2</sup>			
8.9.8.1-5)  <i>This VP represents elevated views from the B842 approaching Stewarton, including those nearby scattered properties with similar views, to the south of the proposed development.</i>	panoramic but directed north along road and include scattered farmsteads and settlement amongst low flat fields with dry stone walls or post and wire fences. The upland skyline in the distance consists of coniferous forest plantation and moorland.  Wind turbines at Tangy I and II and Beinn an Tuirc (Phases 1 and 2) are visible on the skyline to the north. Turbines of Beinn an Tuirc (Phase 3) would also be visible on the skyline, and some tips of Blary Hill and Killean Estate may be visible above coniferous forest plantation.		BaT (Phase 2) Tangy I and II (to be removed)		noticeable along the interior upland skyline (in place of existing Tangy I and II), beyond rounded hills and set back from the western Kintyre coast to the west of the other cumulative baseline sites. The proposed development would be larger and appear closer than other wind farms and occupy a slightly larger portion of the view than the existing Tangy I and II turbines leading to a slightly increased presence of wind turbines in the view.		
<i>Consented/Under Construction</i>		BaT (Phase 3) Blary Hill					
<i>Application/Appeal</i>		Killean Estate					
<b>VP10: Beinn Ghuilean</b> (Refer to Figures 8.9.10.1-5)  This VP illustrates elevated views from a hillside seating area south of Campbeltown and south-east of the proposed development.	Main panoramic views are north over Campbeltown, with Campbeltown Loch and Crosshill Loch prominent in views. Beyond this area, there is an attractive juxtaposition between Aros Moss and the upland interior of Kintyre beyond. Turbines at Tangy I and II are visible here along with several agricultural scale turbines.  To the east, Arran is visible in some conditions but distant.  Topography and coniferous plantation contains long range views	Medium	<i>Operational</i>		The proposed development would replace existing Tangy I and II turbines in the view and would appear larger and closer, occupying a slightly greater part of the view, beyond rounded hills and set back from the western Kintyre coast.  The proposed development would result in a perceptible increase in wind turbines but combined with other sites would not significantly increase the prominence of turbines as a	Low	<b>Minor</b>
<i>Consented/Under Construction</i>		BaT (Phase 2) Tangy I and II (to be removed)					
<i>Application/Appeal</i>		BaT (Phase 3) Blary Hill					
<i>Application/Appeal</i>		Clachaig Glen Killean Farm

<i>proposed development.</i>	distance to the north-east above the upland interior of Kintyre, including most notably Beinn an Tuirc (Phases 1, 2 and 3) and Deucheran Hill, with Blary Hill and Killean Estate situated in between.  Single turbines to the south-east are barely perceptible at this distance.		BaT (Phase 3) Blary Hill	Balsalloch Farm	prominent in this view as a whole.		
			<i>Application/Appeal</i>				
			Killean Estate				

## 1.2 Receptors on Routes

Route and Description of Views within Cumulative Baseline Scenario	Sensitivity to Additional Change	Existing and Proposed Wind Developments Theoretically Visible		Nature of Change	Cumulative Magnitude of Change	Cumulative Visual Effect
		Frequent	Occasional			
<p><b>A83, including Core Path C304</b></p> <p>Principle road north and south for those on the Kintyre Peninsula that connects Campbeltown with Tarbet near Loch Lomond (outside the study area) and includes a short Core Path at Glenbarr. For receptors travelling along this road through the study area, wind developments are occasionally visible for short sections of the road, or visible for long stretches (e.g. on Gigha) but not in the immediate context.</p> <p>The most extensive sections of this route are affected by Gigha and Gigha Extension (both Operational) along much of the route down the west coast in coastal views, and Airigh along the majority of the route north of Glenbarr in northerly views. Other developments affect shorter stretches of the route, throughout the study area, in intermittent views.</p> <p>The existing Tangy I and II is visible in intermittent views to the south for a relatively short section around Glenbarr, where other sites like Beinn an Tuirc (Phase 1), Blary Hill and Auchadaduie are present in easterly views.</p>	Medium	<i>Operational</i>		<p>Turbines at the proposed development would replace Tangy I and II in southerly views in the vicinity of the settlement of Glenbarr and intermittently as occasional blades in inland views above steep slopes further south.</p> <p>The proposed development would replace Tangy I and II in southerly views from the Glenbarr area. The increase in scale of turbines would be noticeable but this comprises a very short section of the A83 overall and would not very noticeably increase the prominence of wind development as a feature of the journey as a whole. This would comprise a perceptible increase to the cumulative baseline scenario.</p>	Low	Minor
		Gigha Gigha Ext.	Allt Dearg BaT (Phase 1) BaT (Phase 2) Cour Deucheran Hill Freasdail Gartnagrenach Kildalloig Farm Srondoire Tangy I and II (to be removed)

Route and Description of Views within Cumulative Baseline Scenario	Sensitivity to Additional Change	Existing and Proposed Wind Developments Theoretically Visible		Nature of Change	Cumulative Magnitude of Change	Cumulative Visual Effect
		Frequent	Occasional			
Extension are visible to the north-west in the distance, while some turbines and blades of Beinn an Tuirc (Phase 2) and Beinn an Tuirc (Phase 3) are/would be visible from the southern section of the route, nearest to Machrihanish.		<i>Consented/Under Construction</i> BaT (Phase 3)		than the cumulative baseline sites. However, they would not add development to a new part of the view or combine with other sites to result in wind turbines becoming a newly prominent feature of views from this route.		
		<i>Application/Appeal</i>				
<b>Core Path C087, C447, C448</b> These core paths follow a minor road which connects the coast with the B843, running along an area of flat farmland. Tangy I and II is visible on the skyline to the north. Various other wind developments are visible as tips and blades above the skyline north-east and more distantly to the east and north-west, but often screened by intervening trees, buildings or landform.	Medium	<i>Operational</i> Kildalloig Tangy I and II (to be removed)		Turbines at the proposed development would be visible in views to the north in place of existing Tangy I and II. The proposed development would result in a perceptible increase in wind developments, given the increased scale, but would not add wind turbines to a new part of the view or increase the prominence of wind turbines in general as a feature of the view.	Low	Minor
		<i>Consented/Under Construction</i> BaT (Phase 3)				
		<i>Application/Appeal</i>				
<b>Core Path C083</b> This Core Path is an elevated forest walk with views overlooking Campbeltown and Island Davaar. Tangy I and II is visible in the middle distance to the north-north-west. Other cumulative baseline sites form a separate cluster in the northern part of the view. From the upper part of the route, turbines of	Medium-High	<i>Operational</i> BaT (Phase 1) BaT (Phase 2) Gigha Gigha Ext. Tangy I and II (to be removed)		Turbines at the proposed development would be visible in views to the north (in place of existing Tangy I and II). The proposed development would cover a slightly larger part of the view further to the north from upper parts of the route	Low	Minor
