

Doraville Wind Farm Information Event

SSE is proposing a wind farm at Doraville, situated west of Draperstown and north-west of Cookstown.

In December 2015, SSE submitted an Environmental Statement for the proposed Doraville wind farm. Following submission, SSE engaged with the Department for Infrastructure's statutory consultation process. Feedback has been received from various statutory and non-statutory consultees and stakeholders, with amendments being made to the proposed development design in order to, where possible, address comments received in advance of responding to a request from the Department for the submission of Further Environmental Information.

Ahead of this submission SSE will hold a public information exhibition in order to present the updated proposal for the wind farm to the public, and to provide clarity around changes to the proposed development.

**Thursday 23rd March 2017 4pm-8pm
The Glenavon Hotel, Cookstown**

Copies of the exhibition boards will be available for download from the project website:
ireland.sse.com/Doraville from 24th March 2017.
